

**Warmup + midterm practice:**

What modifiers (or lack of modifiers) does each of the following have in the ORIGINAL field or method?

1. `length` for arrays, i.e. `myArray.length`

public	final	static
private	non-final	non-static

2. `size()` for `LinkedLists`, i.e. `myList.size()`

public	final	static
private	non-final	non-static

3. `BLUE` for the `Color` class, i.e. `Color.BLUE`

public	final	static
private	non-final	non-static

---

**Stacks**

What are some examples of stacks in real life?
