1. What topic(s) do you understand well from the course so far?

2. What topic is most confusing / needs the most work?

3. In terms of difficulty / work load, how has CS 360 been so far?

   ```
   too little     1     2     3     4     5     too much
   ```

4. In class preferences (circle one choice for each):

   - Slides: less   more   as is/no preference
   - Board work: less   more   as is/no preference
   - Group work: less   more   as is/no preference
   - Handouts/worksheets: less   more   as is/no preference
   - Other:_____   less   more   as is/no preference

5. What are some alternative office hour times that would work for you? (note I am off campus on Wednesdays)

6. Have the randomized partnerships (during lab and class) been helpful for your learning and/or general community building? Thoughts?

7. Are the posted notes helpful for your learning? Do you additionally take notes during class?

8. Regarding community guidelines / class policies, do you think computers should be used during class? Why or why not?

9. Any other feedback for the course (labs, lecture, office hours, logistics, etc)? Things that are helping your learning? Not helping your learning?
